RELEVEAU, THURSDAY, JULY 5.  
CANADA'S PROGRESS.

While the faculties have been enlarging upon their allegations, many times proved false, of the alleged denunciation of Canada.

Some well known Libels, such as the Hon. James Young, J. Galt, and the Hon. Geo. W. Ross, Minister of Education in the

Mowat Government, have been taken up by the

side of the Libels in a most efficient manner.

Mr. Young, by his masterly letters to the Libels and his editorials in the Galt

Reformer, has done good service to his country.

Mr. Ross, although, owing to his position as a member of the Mowat Government, the members of which are generally

faddists, has pronounced in the expression of his views, has spoken with good

words for Canada, that his utterance can not fail to give pause to those who might

be inclined to believe the untruthful de

tractors of our country who are working for its commercial annihilation to the United States.

It will be remembered that in the statement which was given in Toronto to the

Marquis of Lansdowne, Mr. Ross spoke in a highly patriotic strain. His

speech at the Canadian Chautauqua on Dominion Day was equally satisfactory. He said:

"I am not immediately concerned with the work we are responsible for in education."

He has been very much interested in the work of the past year, and he has been

## UNIVERSITY OF TRINITY COLLEGE.

Meeting on Behalf of Convocation—

Rev. Professor Clark on the

University Education.

A well attended and very enthusiastic

meeting was held on Monday evening in

the school house, on behalf of the

University of Trinity College. The Rev.

J. W. Burke, M.A., took the chair, and

there were present on the platform Prof.

Holy, Rev. Prof. Clark and Rev. H. Symonds, Clerk of Convocation.

The meeting was opened with prayer,

after which the chairman said he was glad

to see so large an attendance on a public

holiday.

The Provost explained fully the position

of Trinity University as giving the highest

education, based on religious principles, to

both clergy and lay, and strongly emphasized

the importance of training up the

laymen and future clergy together in the

same common collegiate life. Trinity was

highly representative of the whole Church

of England, and claimed the support of

all loyal sons and daughters of the church.

The Bishops of the Province of Ontario are

gladly by the charter seals on the governing

body, as well as the right of nominating

each four representatives from their several

dioceses, and also to ensure the close

connection of Trinity with the church for all

times, and with a veto power on all its

proceedings.

The Provost then went on to speak of the

great progress Trinity had made in the last

few years—mentioning that \$110,000 had

been collected for its educational work.

He mentioned that the professional and teaching

staff had been doubled, and the whole

curriculum thoroughly remodelled and enlarged.

Interesting details were given of the flourish

ing state of the various faculties of law, medicine, music, and divinity, the examinations

in the faculty of music being conducted at present by English musicians of the

first eminence, and the University is thus enabled to render to the cause of

musical progress in Canada the greatest service.

Last year some 140 graduates were enrolled

in the several faculties, whilst the number

of undergraduates is 640.

Reference was then made to some urgent

needs of the University, which it was proposed

to supply. For the enlargement of the

College buildings, erection of a new laboratory, etc., a capital sum of \$60,000 is

required, and an increased income of some

\$3,000 towards the foundation and completion

of additional professorships and tutorships.

For this effort, the University largely relies upon the new movement for

extension of Convocation. Two hundred

names have been enrolled, and the movement

united support of church people, the membership

would rapidly become sufficient to provide

the additional income, whilst the new

organization will be of the utmost importance

in raising the capital sum.

The chairman then called upon the Rev. H. Symonds, Fellow of Trinity College, and

Clerk of Convocation, to explain the working

of Convocation.

Convocation was the great consulting

body of the university. By the terms of the

charter, the members of convocation were

graduates who subscribed \$5.00 for the

support of the university, and in this way

following the model of the great universities

of Europe, Convocation would be a

factor of growing importance in the

life of the university. It was last year

resolved to extend the usefulness of convocation

by enrolling as associate members all

friends of the university throughout the

country, who contributed to the fund

annually as graduate members, such associates

including ladies in conjunction with the

graduate members in each district who

are to be formed into local associations, and

each association to send a representative

to the Executive Committee. By means of

this organization the university would be

brought into living connection with the

church people in every district and great

good would be done.

The Rev. D. P. Bogart, M.A., then

moved the following resolution, seconded by

Rev. S. Daw:—

That this meeting have heard with

great gratification of the movement for the

extension of Convocation, and the further

## A VIVID PICTURE.

Archdeacon Farrar in the Forty-ninth

Review gives a terrible picture of the vice

of drunkenness in England. He says:

"The nation of England at this time

is still drunk. I know no subject on

which the national conscience is so fairly

seared as it is with a hot iron. I think

that it would be impossible to demand

for searching and radical reform in the

drunken legislation could be proposed, as it is,

by fatuous jokes and despicable epigrams if

those who have so long successfully resisted

the lighted demands of suffering multitudes

could only see, as the parish clergyman, the

prison chaplain and the hospital surgeon

see, the hideous train of pain, disease and

destruction which wrecks the life of the

present condition of our liquor traffic entails.

I can answer for it that in my own parish

—which contains many of the poorest—

there would be hardly any crime, or absolute

destitution, or hopeless misery, if we

could eliminate the cause of drink,

fostered by multitudes of needless gin

shops. We spend on drink directly nearly

\$120,000,000 a year, and indirectly a sum

almost inconceivable. In the Judicial

Statistics for 1885, page 20, I find

that 166,130 persons were summarily

proceeded against for being drunk and dis

orderly. In the London district about 60,000

are yearly arrested for drunkenness, and

of these 10,000 are women. The numbers

are many more nothing to the readers, to

others they mean crimes of every degree

of violence and infamy—the fendish kick

ing and beating and maiming of wives, the

brutal ill treatment of young children, the

overriding and slow murder and starvation

of tens of thousands of infants, the

poisoning of blood in another generation

of criminals and harlots."

**Daily Intelligencer.**  
PUBLISHED TUESDAY, JULY 10, 1918.  
DOCTORS DIFFER.

The mail, after pointing out the alleged duplications of the Canadian farmer, goes on to say:

These and other symptoms are manifest in an annual crop in the United States, exhibiting signs of distress and exhaustion in consequence of the restriction of production in other parts of the world.

If it be true that it would be market of six million has not made the farmers of the United States more prosperous than those of Ontario, "what benefit, pray, would the importation of the surplus of wheat to the agriculturists of Ontario really entail?"

Would not the introduction of the Canadian surplus into the market tend to depreciate it still further, and so to reduce prices on both sides of the line?

Would not the introduction of the product of the Western States into the Canadian market, have a seriously injurious effect upon the agricultural industry of Canada?

It is a question, however, whether the farmer in Ontario, although it is the farthest of the line, in that the Canadian farmer is not a wage-earning individual who is gradually making under a heavy burden of taxation, but a fairly prosperous farmer of the community, whose industry is decidedly more flourishing than is on the other side of the line. It is, however, another exemplification of the difficulty of the journal which makes it a few weeks ago it held the view that a conspirator Wiman, who said that the greatest blessing which could be conferred upon the Canadian farmer would be to raise him to the same level of property as is enjoyed by the agriculturists of the United States.

The motives of these agitators are as clearly apparent as are their incoherence, and contradictions of each other's assertions. They are not in agreement in the stories which they have to tell before they can expect to make any conversions from among the intelligent people of Canada. The C. O. doctors differ and their party beating will die.

**The Road to Heaven.**  
"A map of the road to heaven, by a soul in purgatory," writes an author and literary critic, describing the ideal, and humorously confessing his failure to attain it. But, if one knows the right path, he should follow it. Why, then, suffer in the purgatory of disease, when the way of escape is so plain? As a remedy for nervous affections of the throat and chest, including consumption in the formative stages of tuberculosis, chronic bronchitis, larynx and morbid growths of the throat, and lung cancer or inoperable blood, Dr. Pare's Golden Medical Discovery has neither a rival nor a worthy successor.

Chronic nasal catarrh positively cured by Dr. Pare's Discovery.

Another C. P. B. Project.  
The South Sea, Mar. 10, 1918, waterway railway, construction on which will be commenced, will be built in the main by Canadian and American capital. It is intended to constitute the link between the Pacific and the Canadian Pacific railways, giving the former a direct route to the water from the Missouri River 200 miles shorter than any now open, and to the Canadian Pacific its coveted extension into territory south-west of its present system in Manitoba and Ontario. A \$100,000,000 has been expended in surveying and other preliminary work.

**Killed by a Firecracker.**  
Coroner Woodward, of Brockton, has held an inquest on the body of Percival Hodgson, who was accidentally killed by one of his playmates, Ernest Plamondon, both were playing in Mr. Flinders' farm where they found a loaded shot gun. Young Flinders, who was not over 10 years of age, loaded, shouldered it and aiming at the little friend said, "Money or your life." He pulled the trigger and the fatal shot, rattling little Hodgson with shot. He died shortly afterwards. The jury returned a verdict of accidental death.

**MAJORAL PEST AND CHILDS** are both broken and put back by using MOTHER'S ANEMIC GIVING WINE.

For some time past, target shooting has been so intensively carried on in a vacant lot on Napoleon street, Montreal, under the very eyes of the authorities, who never even thought of putting a stop to the dangerous practice. As a result, this afternoon, a \$5,000 insurance was entered on Monday against the city of Montreal, and a man named Mosen, whose young son was wounded by a stray bullet, from the field, while passing on Napoleon street.

1. *Journal of the American Medical Association*, 1990; 263: 1033-1036.

In the farm house porch the farmer sat  
With his daughter, having a cosy chat;  
She his only child, and he  
Thought her as fair as a girl could be.  
A wee bit jealous the old man grew,  
If he fancied any might come to woo;  
His own pet lamb and her loving care  
He wished with nobody else to share.

"There should be two of you, child," as  
he  
"There should be two to welcome me  
When I come home from the field at night  
Two would make the old home bright.  
There's neighbor Gray, with his child  
four.

To be glad together. Had I one more,  
A proud old father I'd be, my dear,  
With two good children to greet me home  
Down by the gate 'neath the old elm tree  
Donald waited alone; and she

For when he waited his love call heard  
And on either cheek the blushes stirred  
"Father," she cried, and knelt her down  
And kissed the hand that was old and  
brown—  
"Father, there may be two if you will,  
And I—your only daughter—"

Two to welcome you home at night,  
Two to make the old home bright;  
I—and somebody else." "I see,"  
Said the farmer; "and who may some-  
body be?"

Oh, the dimples on Bossio's cheek,  
That played with the blushes at hide-  
seek!  
Away from his gaze she turned her head  
"One of neighbor Gray's children, sir,"  
said.

"H'in !" said the farmer ; "make it plain  
Is it Susan, Alico, or Mary Jane !"  
Another kiss on the aged hand,  
To help the farmer to understand—  
"H'in !" said the farmer ; "yes, I see ;  
The one for me, the other for me."

But Bessie said, "There can be but one  
For me and my heart till life is done."

Birds that Sew.

Birds that sew—how funny! But it's true. I know of three little birds that sew, and sew nicely, too.

For three of the birds use a hard, tough grass that will bend without breaking. The other—the tailor-bird—makes its

One of the sewing-birds is found in our own country, called the Orchard-Starling. It hangs its nest from the twigs of an apple tree, and this is the way the bird makes

the nest: The outside wall of the nest is built of long tough grass which they pull through and through, with threads of grass in and out, in all directions, just as if done with a needle. This the bird does by means of its bill and feet. A lady once carefully

drew out one of these long grass threads from a nest, and then measured it, found it to be fourteen inches long; and the bird had sewed it in and out of the nest thirty-five times.

In the West Indies lives another kind

starling. This bird cuts leaves into a shape like a quarter of an orange rind and tucks them neatly to the under side of banana-leaf—the leaf forming one side of the nest. It waves with the wind and one dreams that a nest is there.

But the smartest little bird is the one that makes its own thread. It is called the tailor bird because it sews so nicely. It builds its nest in a plant with large leaves. Then it gathers cotton, and by means of its long, fine bill and little slender feet, it

its cotton into a thread; it uses its bill as a needle to carry the thread and sews the large leaves together so as to completely hide its nest from sight. The spot looks like all green leaves. There is no nest to be seen anywhere. But the mother bird

**Story of Annie Laurie.**  
A correspondent of the Chicago *Herald* tells the following story of Annie Laurie.

The famous song that is sung by all singers of the present day, I am informed, is a mystery as to the author. I was raised on the next farm to James Laurie, Alexander Laurie's father. I was personally acquainted with both her and her father, and also with

the author of the song. Knowing the facts, I have been requested by my friends to give the public the benefit of my knowledge, which I have consented to. Annie Laurie was born in 1827, and about 17 years old when the incident

ber name. James Laurie, Annie's father was a farmer, who lived and owned a very large farm called Thraglestown, in Dumfriesshire, Scotland. He hired a great deal of help, and among those he employed was a man by the name of Wallace to act as

foreman, and while in his employ Mr. Wallace fell in love with Annie Laurie, who fact her father soon learned, and forthwith discharged him. He went to his home which was in Maxwellton, and was taken sick the very night he reached there.

the next morning when Annie Laurie heard of it, she came to his bedside and waited for him until he died, and on his deathbed composed the song entitled "Annie Laurie."

To the Fort Worth (Texas) Gazette woman wrote some months ago as follows and her statistics are so well calculated that they will bear reprinting: "My home friend, you say you have for years longed for the free, independent life of the farm-

but have never been able to get enough money together to buy a farm. But that's just where you are mistaken. For seven years you have been drinking a good improved farm at the rate of 100 square feet a gulp. Figure it out yourself. An acre

land contains 43,000 square feet. Estimating land at \$43.50 per acre, you will find that is just 1 mill per square foot and 1 cent for 10 square feet. Now pour down a hefty dose, and imagine you are swallowing a strawberry patch. Call in five of your

friends and have them help you dig a 500 foot garden. Got on a prolong sprce, and see how long it requires swallow a pasture large enough to feed cow—twenty cows."

"After suffering with Dyspepsia, Kidney Disease, loss of appetite and pain in the head until discouraged, I heard of Burdock Blood Bitters, took two bottles and am now happy to say feel as well as ever." M. Rufus E. Morry, New Albany, N. S.

## No. 60

CLEVELAND, July 16.—Four weeks ago a stylishly-dressed man and an equally well-dressed woman came to Cleveland and secured apartments on Franklin avenue, a fashionable street of West Side aristocracy. They lived there quietly as man and wife and conducted themselves in a refined manner. On Saturday night just before

night a police detective and two officers aroused the inmates of the house and searched it. They had a warrant for G. J. Jarvis and Mrs. Magdalene Campbell. The officers waited patiently till they dressed themselves, then they were taken to the Central Station in a hack and locked on a charge of adultery. They remained in prison until Monday morning when they were released.

Mrs. Campbell was discovered to be the wife of Allen Campbell. George J. Jarvis, companion, is a son of the late sheriff of Butte, and both were taken into the judge's private office, where they told their story. Jarvis announced that he was married.

had two children. About a year ago he left his wife and settled \$35,000 to her. He had been intimate with Mrs. Campbell, who is the daughter of a deceased army officer, and was living in Toronto with her mother. Jarvis short time ago went to Europe, first arranging that she should marry Allen Campbell. This was a very serious matter.

out. This scheme was successfully carried out, and when Jarvis came back he found his former mistress living quietly as Mrs. Campbell. Things went on until Jarvis, who had lots of money, got on a spree, and then immediately hunted up Mrs. Campbell and persuaded her to run away with him, she consented apparently without much hesitation, and they at once came to

city. Mrs. Campbell was finely attired, her diamonds sparkled strangely in the prison. "Of course I lived with George, his wife," she said. "It was wrong, I love him as I never have, never can, Allen. When Gerge came for me I could not resist." She states that she married Campbell in April last and Jarvis announced

that they were in this State with the mate object of procuring respective divorces and then being married. The couple released on bail until Wednesday. aristocratic people who received Jarvis and Mrs. Campbell in society are badly shocked.

**THE FISHERIES TREATY.**

**Mr. Pugh Addresses the Senate in Favor of its Ratification.**

WASHINGTON, July 16.—The Senate proceeded to the consideration of the Fish Treaty in open executive session and addressed by Mr. Pugh in favor of its ratification. He said that the people of Canada and the United States are

were naturally citizens of the United States and could be made so by practice, so that would be the best policy of the people of the States to be liberal and forbearing with that neighboring people. The reason for the opposition to the treaty found in the fifteenth article, which, it is feared, would give the American man to Canada.

He referred to a statement made by Sherman in secret session that he intended to offer an amendment to strike out the fifth article under the general understanding that amendments were to be offered and said that he was not until Republican Senators had determined that no amendments would be offered that they agreed to bring the bill to a vote.

In conclusion he said that the president had discharged his duty with due regard to the rights of American fishermen and from any partisan consideration. It was for the people to decide whether the president or the Senate was most to blame for keeping up the disturbed condition of the coast.

Mr. Chandler addressed the Senate in opposition to the Treaty.

**Alleged Bad Effects of Co-Education in the Capital.**

OTTAWA, July 16.—For a long time the at the Ottawa Normal School to prevent commingling of the sexes were of the strict kind. The were not even allowed to recognize each other on the street. Year the rules were relaxed so far as to permit the young men to call on the young ladies and keep their company in excursions. This conclusion was the

wise in view of the fact that the prize was already enjoyed by some disabled students. Just here the significant remark engaged the attention of the faculty. "No year no student was awarded the Governor's medal at the annual examination." There was a good deal of typhoid prevalent among the students and the faculty.

any one to qualify as a medalist did, therefore, attract much attention. This year, however, at the examinations held not a single student qualified for medal, and moreover, there were no students, an extraordinary result, which members of the faculty attribute to association of the sexes in the evening.

**MONTREAL MARAUDERS.**

MONTREAL, July 16.—A. St. Jean, resides on Roy Street, had his house burglarized yesterday and jewelry, wine, to the value of \$2000 were stolen.

A well dressed London immigrant named Sheppard after arriving in port, by steamship Vancouver, had his purse

from his pocket. He claims that he has \$1000 in it, with which he had intended to go into business here. He says that he has been taken into a respectable looking place on Notre Dame Street and there had been drugged and robbed.

St. JOHN, N.B., July 10.—The log rafts of the province are almost ready to launch, but the Government has as yet taken no steps to prevent it. The Minister of Marine told the House in a recent session that the Government was during the recess considering measures to prevent such rafts going to sea, as they endanger shipping. The only law on the subject is one providing that rafts while drifting

at anchor, shall show a bright fire  
sunset to sunrise, and that they shall  
navigate as to cause no unnecessary  
struction to vessels in Canadian waters.  
owner is liable for damages if these rules
